Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 3, line 8, delete "in that" .

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record and otherwise known to the examiner does not teach an optical fiber or method for manufacturing a coated optical fiber wherein a coating over the central portion comprising a central core and a cladding meets the descriptions set forth in instant claims 1, 2 and 3. It is agreed, upon reconsideration, that the disclosure of Garito et al is directed to an optical fiber core having a graded refractive index rather than to a coating over the cladding section on an optical fiber core section, as instantly disclosed and claimed. See Applicant's remarks filed 11-24-2003, pages 5-6 for a more detailed discussion of the differences between the disclosure of Garito et al and the instantly claimed invention. Matsumura et al also disclose a polymeric optical fiber wherein the method of crosslinking a polymer to provide a continuous refractive index gradient is performed after heating and drawing the polymer into an optical fiber rather than to form a coating over a cladding section on an optical fiber.

The following references are newly cited as art of interest. Babirad et al (4,971,424) disclose the method steps of instant claim 3 in column 8; however, the radiation curable composition is employed as a cladding composition and is completely polymerized. There is no disclosure of an increasing level of crosslinking in the coating used as cladding. Fan et al (5,054,872) disclose polymeric optical waveguides wherein a layer of polymeric material has preselected regions of different degrees of polymerization and

different refractive indices formed by photolithography to provide waveguides. See column 10, lines 47-66, and column 11, lines 21-68.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
